

Many good reasons to choose Aluminum Tubes

Expect nothing less than excellence

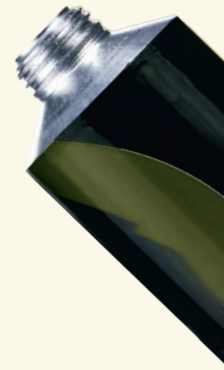

Our Business History

Tubal Egypt was established in Cairo in 1980 as part of a family of companies. Our production of collapsible aluminum tubes utilizes the latest technology and advanced production lines.

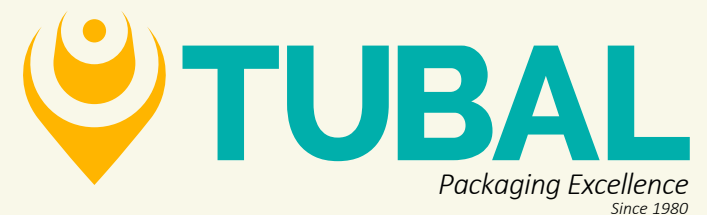

Our facilities are equipped with class C clean rooms to meet the strict specifications of the pharmaceutical industry. With the help of high-tech in-line cleaning and leak control machines, as well as up-to-date quality procedures, we ensure that our products maintain the highest level of quality.

We supply a diverse range of industries, including pharmaceuticals, food, healthcare, cosmetics, inks, and industrial products. In addition, by using aluminum tubes, we contribute to environmental sustainability as aluminum is one of the most eco-friendly materials available and can be 100% recycled, ultimately helping to save our planet.

Three good reasons, Why Tubal Egypt S.A.E.

1- Our Services

Maintaining transparency is crucial for the smooth functioning of any profitable enterprise. We take great pleasure in receiving feedback from our clients, and promptly take necessary actions based on it. We view our clients as our collaborators, and therefore strive to offer effective solutions to foster a successful partnership.

2- Over 40 years in the market

With over forty years of outstanding performance and worldwide acclaim, Tubal Egypt holds the distinction of being the inaugural aluminum tube producer in the MENA region. Our legacy is deeply rooted in Egypt's aluminum tube manufacturing history.

3- Innovation & Growth

By continuously adapting innovative approaches and keeping up with the latest technological advancements in our industry, we are constantly evolving. As a result, we have increased our production capacity to 150 million tubes per year.

However, it's not only about how much, it's about delivering on 3 vital principals:

- **QUALITY**
- **TIME**
- **SERVICE**

Our global expansion speaks for itself.
